DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 4- 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Takiguchi et al, US2002/0032696, hereinafter, Takiguchi.

As per claim 4 Takiguchi teaches acquiring a first set of digital images during a first single session; and marking said first set of digital images during said first single session as related images see for example column 10 paragraph [0185](orderly displaying of data associated in rings).

As per claim 5 Takiguchi teaches displaying said first set of images as being from a single film roll see for example column 20 paragraph [0352] and figures 53- 57.

As per claim 6 Takiguchi teaches acquiring a second set of digital images during

a subsequent second session; and marking said second set of digital images during said second session as related see for example column 19 paragraph [0344] and figures 53- 58.

As per claim 7 Takiguchi teaches giving said first set of digital images a same creation date and time see for example column 10 paragraphs [0195] and [0199] and figure 7.

As per claim 8 Takiguchi teaches selecting at least one image displayed in an image display area; and selecting a keyword button from a keyword button area see for example column 20 paragraphs [0352](738 as group identifier and 731 as data identifier and 736 as icon picture ID) and figure 57; and marking said at least one image with a keyword associated with said keyword button see for example column 20 paragraphs [0352](flagging and displaying of data icons as shown in figures 55 a- d).

As per claims 9- 10 Takiguchi teaches displaying said selected keyword in said image display area and at least one image see for example column 20 paragraphs [0352] and figures 55- 58.

Allowable Subject Matter

Claims 1- 3 are allowed.

The following is an examiner's statement of reasons for allowance:

None of the prior art either singularly or in combination teaches or fairly suggests

the applicant's invention of "selecting a first set of images from an image collection such that said first set of images will fit within said image display area along with a first specified minimum amount of space between images, an extra amount of space being generated by subtracting a width of said first set of images and said minimum amount of space from said size of said image display area ".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure; 5,835,094, US2002/0057272, and US2002/0145614.
